QUOTRON® II

STOCK MARKET DATA PROCESSING SYSTEM

Pictured is the new QUOTRON II Desk Unit*

The very latest in electronic stock quotation systems, QUOTRON II prints out the following information on any stock by push-button request—instantly:

- Last sale price, net change for day, up tick or down tick, ex-dividend noted, flash prices noted.
- Open, high, low, volume, bid-asked.
- Dividend rate (footnoted if necessary), dividend yield percent, earnings, price-earnings ratio.
- Also market averages continuously updated, most active stocks and other market statistics.

Information is furnished by the QUOTRON II Computer Center located in the heart of Wall Street—the largest computer center in the world devoted to the processing of stock market data. Your broker's QUOTRON II Desk Unit has a direct line to this Computer Center.

*QUOTRON IS A REGISTERED TRADE MARK OF SCANTLIN ELECTRONICS, INC.
